Our vision - Generations of healthy young Australians living to their full potential

The Life Education primary school program focuses on issues around food and nutrition, personal safety, physical activity, cyber-safety, safety with medicine and legal drugs: tobacco, alcohol and caffeine.

The drug and health education modules help children to develop relationship skills, positive communication (both face to face and online), problem solving and decision making skills.

Student will develop strategies and skills required to avoid the harms associated with an unhealthy lifestyle.

All messages are age-appropriate, relevant and enhance and support the messages taught in Australian schools.

Parents, if you would like to learn more about what your child will be learning there is a parent van session on Tuesday 13th September 9:15-9:45. Please note, Life Education is a not for profit organisation and rely on the student program fee cost ($10 per student) and public donations to keep it operational. Unfortunately the cost toeing the van to Narracan, is cost prohibitive so that is why we are having our van sessions at Thorpdale Primary.

The little Room Life Ed Van session investigates a range of health & well-being issues E.g.:
- awareness of the basic needs to stay healthy and safe
- identifying safe and unsafe behaviours and environments
- knowledge of safe people and places to turn to for help
- how to help others
- exploring healthy food options

The Big Room Life Ed Van session focuses
- awareness of the basic needs to stay healthy
- responsible and respectful behaviour when using communication technology
- skills for building positive relationships with friends
- keeping personal information safe online
- strategies to deal with bullying and cyberbullying
- exploring the role of bystanders
